

# ALBOS NEXT STEP

~Feature and Development schedule~

2019.04.01

Ver1.0.7

ALBOS AND MARE PARTNERS OÜ  
Tallinn, Estonia

# ALBOS Concept

---

## ALBOS payment service solves this issue

with a hybrid system that combines a truly discrete and decentralized system on a public block chain with and off-chain system, using the merits of global services and cryptoeconomy as a whole to build a cutting-edge payment platform that anyone can use.

### 01. IMMEDIACY

Almost no stores will accept a payment method in which the consumer must wait a long time for the payment to be completed.

### 02. TRANSACTION FEE

The relatively high transaction fee on the cryptocurrency network.

### 03. VOLATILITY

The price of the cryptocurrency fluctuates dramatically and can be a speculative purpose.

---
